Programming

Javascript, React
Python
(Django, Flask)
CSS & HTML
C, Java

experience

2017 - 19   **Software Engineer at Medlife.com**   Medlife.com

- **Paid Consultation, Subscription** Developed the UI of paid consultation feature from scratch and re-developed the user journey of subscription feature in micro teams. Worked on developing required backend APIs for these features too.

- **Medlife for Doctors** Worked on code stability and refactoring of application that is used by all the doctors in Medlife, and saw the user base of doctors grow from 400 to around 3000 active doctors per day.

- **Edit Rx facility to doctors** Worked on this feature to allow doctors to edit prescriptions directly from the app, and place orders directly post doctor approval, taking care of inventory, prescription, discount and order modifications in the backend.

May 2015   **Application Development Internship**   IIT Bombay, Mumbai
Development of IITBombayX analytics dashboard using Django framework

achievements
